

Connecting to WLU-WiFi for Windows 7

If you are having trouble connecting to the WLU-WiFi wireless SSID, then it is possible, that you may need to manually add that network. Please see the steps below.

1. Go to Start (or the windows icon in the lower left hand corner)
2. Click on Control Panel
3. Click on Network and Internet
4. Click on Network and Sharing Center
5. Click on Manage Wireless Networks (left hand side)
6. Remove all associated West Liberty networks
7. Click Add
8. Choose Manually Create a Network Profile
9. Enter the following:
 - a. Network Name: WLU-WiFi
 - b. Security type: WPA2 – Enterprise
 - c. Encryption: AES
10. Click Next, then Close
11. From the manage wireless networks screen
12. Right click WLU-WiFi
13. Go to Properties
14. Security tab
15. Click Settings
16. Uncheck Validate server certificate
17. Click Configure and Uncheck Automatically use my Windows log in name.
18. Click OK
19. Go back to the Security Tab option
20. Under Advanced Settings
21. Check Specify Authentication mode
22. Choose User Authentication

23. Click OK

24. Now you should be able to click your wireless icon in the bottom right hand of your screen by the clock

25. Enter your username and password

26. You should now be connected.

If you are still unable to connect, please stop by IT Services in Main Hall with your laptop for assistance.
